

OCT screening will
SAFEGUARD
your eye health

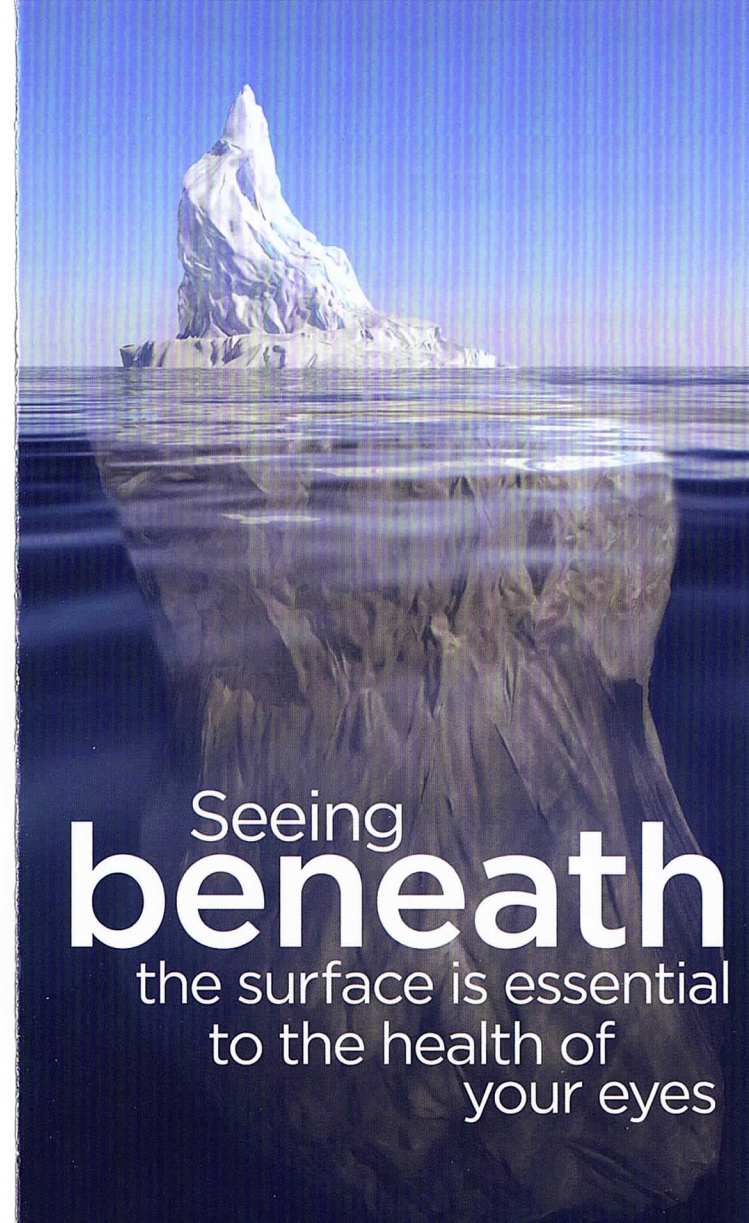

The health of your eyes matters to you and it matters to us too, which is why we are offering OCT to all our patients.

OCT is a new, completely painless and highly advanced imaging system that checks for potentially serious conditions such as glaucoma, diabetes, age-related macular degeneration, vitreous detachments and more.

Today at your Opticians

Topcon are the leaders in R & D and manufacturing of OCT, optical and electronic equipment for medical and ophthalmic applications.

Seeing
beneath
the surface is essential
to the health of
your eyes

3D OCT screening can detect potentially serious conditions that can affect your eyesight and your overall health.
